

100% MEDICAL DEVICE FOCUSED

Design • Build • Service

Next Phase

MEDICAL DEVICES LLC

The leading low- to medium-volume outsource partner for complex EMD and Single-use medical devices in North America.

At NextPhase Medical Devices LLC we have well-trained customer-centric teams with extensive medical industry knowledge and the drive to deliver the highest quality medical device design, development, manufacturing, and assembly services available. Our more than twenty years of experience have earned us numerous industry awards, including Medical Design Excellence awards. We're proud to have a range of customers spanning from innovative start-ups to multinational OEMs.

Single-Use Devices

NextPhase™ is your one-stop contract manufacturing partner for a wide variety of Class II, and III single-use medical devices. We have the experience, expertise, and capabilities to produce complex medical devices. Our Value Stream Teams are dedicated to your product's success and deliver a speed-to-market advantage. You will benefit from LEAN manufacturing best practices that provide superior value to our customers throughout the entire product life-cycle.

Electromechanical Devices and Active Implantables

Looking for a turnkey, U.S.-based, and FDA-complaint EMD capital equipment medical device manufacturer for your entire product life-cycle? We have a proven trackrecord of decreasing manufacturing costs by expediting production timelines while holding to the highest standards of quality. Our robust quality systems have earned a strong reputation with some of the largest names in the medical device industry. We understand the unique standards and requirements of all Class II, and III medical devices.

Electromechanical Devices After Market Services

Our after-market services include customer service phone support, product warranty service, product repairs, trending data analysis, and sustaining engineering. Our customer service department provides technical and phone support with a system robust enough to meet the needs of our customers. For many clients, we set up a toll-free number to take their customers' inquiries directly. Our technical team provides returned EMD product evaluation, root cause analysis, and warranty repairs. Our customer service is another example of how we handle the nitty-gritty and all of the details so you can focus on your core business.

A Customer-Centric Organization

As a customer, you can count on best-in-class services, well-planned processes, attention to all details, a do it right the first-time approach, and a dedicated, responsive team that leverages their buying power, oversees manufacturing execution systems (MES), and maintains all medical device history records. We reduce a product's time to market and maintain full compliance in accordance with regulatory requirements, thus allowing our customers to focus on their core business.

LEAN Is More Than a Process, It's Our Culture

For more than a decade NextPhase has been integrating LEAN philosophies, tools, and systems into our daily operations. Our company culture is defined by our core values and dedicated to developing an environment of continuous improvement. Our goal is to continuously improve the quality of your medical device while reducing cost. *Learn more at www.nextphasemed.com.*

LEAN Systems

SUD (Single-use Device) Experience

- Aesthetic medicine
- Anesthesiology
- Blood management
- Cardiology
- Diagnostics
- Dialysis
- Drug delivery
- Electrophysiology
- Endoscopy
- ENT
- General surgery
- Laparoscopy
- Minimally invasive therapies
- Orthopedic
- Respiratory
- Urology
- Women's health
- Wound therapy

NextPhase has a robust product development capability, so we can help our customers with the entire life-cycle of their products

EMD (Electromechanical Device) Experience

- Arthroscopy and orthopedic surgery support systems
- Battery-powered devices and battery charging
- Cryotherapy devices
- Dermatology systems
- Diagnostic carts
- Doppler ultrasound devices
- Drug and biologics delivery systems
- Electronic tissue ablation devices (RF)
- Electrosurgical systems
- Endoscopic light sources (xenon, metal halide, fiber optic, UV)
- Endoscopy devices
- Fluid management/fluid monitoring systems
- Hydrothermal ablation systems
- Laparoscopic/hysteroscopic insufflators
- Neurological diagnostic devices
- Tissue ablation devices (RF, Cryo)
- Vision testing systems
- Wireless systems data transfer & integration (WiFi/Bluetooth)
